

TOUR OF THE PREMIER ADVANCED RECYCLING CENTRE: PARC

CIWM North East and Premier Waste Management Ltd invite you to visit the Premier Advanced Recycling Centre (Parc) in County Durham, on Thursday 24 January 2008 at 1400 hours.

About Parc

Parc is an integrated waste treatment plant capable of treating a range of waste from un-segregated municipal solid waste (MSW) to source segregated bio-waste. With the emphasis on meeting government targets for waste reduction, landfill tax rising, the likely introduction of a carbon tax plus environmental worries over green house gases it was time for a viable alternative to incineration. The Parc treatment gives huge diversions away from landfill, produces outputs that have sustainable and economic markets plus manufacturers soil alongside lowering green house gas emissions.

- Parc is a proven, flexible, carbon-efficient waste treatment solution.
- Parc offers a low cost route to LATS compliance.
- Parc is planner and community friendly – deliverable in 12 months.
- Parc can be financed over short term 10-12 year contracts.
- Parc has been tried and tested over five years and has shown it can deliver a huge reduction in landfill.
- Parc is a solution that can be placed near to waste production further reducing the waste's carbon footprint.
- Parc is extracting more recyclable material from waste that would normally be landfilled.
