### DIRECTIONS TO MARCHWOOD ENERGY RECOVERY FACILITY

From the M3, take the left-hand exit onto the M27 west bound carriageway and travel along the M27 for approximately 2 miles. Exit at Junction 3 onto the M271, continuing on for approximately 2 miles until reaching the end of the motorway at the roundabout. Take the second exit on to the A35 westbound. Continue on the dual carriageway for approximately 1.3 miles to the Rushington roundabout.

At this roundabout, take the first exit onto the A326 and stay in the left lane to the traffic lights, turning left onto Jacobs Gutter Lane. Stay on this road (which becomes Bury Road) for almost 2 miles and which ends at a roundabout. Take the first exit onto Normandy Way.

Carry along this road for approximately 1 mile, going straight ahead at the mini-roundabout (main entrance to Marchwood Industrial Estate). Take the next left onto Cracknore Hard, also signposted to the Sea Mounting Centre (SMC). Follow this road to the end, passing the SMC and a single track pinch point. Take the first left after the pinch point, which is the back entrance to Marchwood Industrial Estate. You will see the ERF dome directly ahead of you. Please note the speed limit on this road (Oceanic Way) is 20 mph.

Upon entering the facility gate, you will see the weighbridge office on the left. **YOU MUST STOP AND SIGN IN AT THE WEIGHBRIDGE OFFICE.** Access to the visitor's parking area is via the road around behind the dome (do not enter the dome), with parking between the front of the dome and the waterside.

Visitors must also stop and sign out at the weighbridge on leaving the facility. To open the exit gate, please park squarely on the yellow painted oblong in front of the exit gate. There is a small lay-by outside the gate where you can stop your vehicle while you sign out at the weighbridge.
