

A key role of WISH is the publication of health and safety guidance specific to the waste management and recycling industry. This guidance is produced by WISH working groups consisting of industry specialists and representatives from other bodies including the HSE. A list of current WISH guidance is given below, which can be downloaded for free from the WISH website (<https://wishforum.org.uk/>):

| WISH Reference | Guidance Document |
|----------------|---|
| Waste 03 | Orphaned compressed gas cylinders in waste and recycling industries |
| Waste 04 | Waste and recycling vehicles in street collection (under review) |
| Waste 05 | The safe use of refuse collection vehicle hoists and bins (under review) |
| Waste 06 | Skip and container safety in waste management & recycling |
| Waste 08 | Compaction equipment: User and public safety |
| Waste 09 | Safe transport in the waste management and recycling industry |
| Waste 10 | The safe recovery of petrol from end-of-life vehicles |
| Waste 11 | Safety at 'bring-sites' in the waste management and recycling industry |
